TASK 33 / Thermal Gasification of Biomass

of the
International Workshop

**Health, Safety and Environment
of Biomass Gasification**

PROCEEDINGS

Editors: Stefan Fürnsinn
Ruedi Bühler
Hermann Hofbauer

Topics: Gaseous Emissions
Waste Water
Risk Assessment
Permission Procedure

September 28, 2005

Hilton Hotel Innsbruck
Salumerstraße 15
A-6010, Innsbruck, Austria

Supported by the
European Commission under the
Intelligent Energy - Europe
Programme

Gasification Guide WP 5: Objective of the Work

- To ensure that the results and the guideline are widely disseminated to key market actors across Europe
- What, Who, How and When
- From a Guideline to an International Standard

Measures to Fulfill the Target

- Establishing a direct relationship with a selected group of experts united in an existing bio-energy network (ThermalNet ?)
- Setting up of an advisory group
- Organisation of a number of European, regional and national workshops
- Arranging & stimulating discussion opportunities on the gasification mailing list
- Production and distribution of promotional materials
- Creation and maintenance of a project website

Advisory Group

The Advisory Group will comprise around 10 members consisting of:

- four WP leaders
- the **ThermalNet** and IEA coordinators
- at least two scientists
- someone from the regulatory side (to be appointed in discussion with HSE).
- at least two manufactures (industrial partners are members of **ThermalNet**)

Interactive Workshops

- **two European workshops**

- focus on the results of the first site visits to existing plants, the draft guideline, the risk assessment tool and the legal frame (M12)
- focus on the updated draft guideline based on feedback from the case study objects (M30)

- **three regional workshops**

- (1) Workshop in one of the new Member States involving stakeholders from Poland, Romania, Czech Republic, Slovakia, Hungary and Bulgaria
- (2) Workshop in one of the Nordic States involving stakeholders at least from Sweden, Finland, Denmark
- (3) Workshop in one Southern European country involving stakeholders from at least Spain, Italy and Greece (M33-36)

- **one German workshop**

- take into account the experiences from the operation of biogas plants and its safety standards (M24)

Arranging & stimulating discussion

Each year the mailing list

http://listserv.repp.org/mailman/listinfo/gasification_listserv.repp.org

attracts several thousand contributions from all over the world.

Promotional materials

- Promotional material will
 - include flyers,
 - brochures,
 - papers,
 - reports,
 - articles in existing newsletters like ThermalNet,
 - etc.

Project Website

The “Gasification Guide” Project Website shall be an effective information, communication and dissemination tool of the project progress and its results
